PROFESSIONAL SUMMARY

Computer Science student skilled in building scalable web applications and distributed backend systems using Go, Node.js, and Next.js. Experienced in REST APIs, event-driven architecture, real-time systems, and modern database technologies. Strong interest in backend engineering and distributed systems.

TECHNICAL SKILLS

- **Languages:** Go, Java, JavaScript, TypeScript, Python
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, Gin
- **Frontend:** Next.js, React.js, TailwindCSS, shadcn/ui
- **Databases:** PostgreSQL, MongoDB, Firebase, Redis
- **Infrastructure & Tools:** Git, GitHub, Docker, RabbitMQ, Linux

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer Intern

June 2024 – July 2024

Unified Mentor Pvt. Ltd.

- Developed responsive full-stack applications using Next.js with focus on performance optimization.
- Designed role-based workflows and backend logic for a digital governance platform.
- Integrated REST APIs, authentication systems, and database-driven features.
- Helped digitize manual processes, reducing operational effort by approximately 70–80%.

PROJECTS

Event-Driven Order Management System

[GitHub](#)

Tech Stack: Go, Gin, RabbitMQ, PostgreSQL, Redis, Docker

- Designed an event-driven distributed order processing system using RabbitMQ for asynchronous communication across Order, Inventory, Payment, and Notification services.
- Implemented Saga-based orchestration, idempotent consumers, retry mechanisms, dead-letter queues, and the Outbox pattern.
- Ensured concurrency-safe inventory updates using PostgreSQL transactions with row-level locking.
- Designed structured event envelopes with correlation IDs for distributed tracing.
- Containerized microservices using Docker for consistent deployment and environment isolation.

Smart-AgriWaste Platform

[Website](#) | [GitHub](#)

Tech Stack: Next.js, Express.js, MongoDB, Tailwind CSS, shadcn/ui, Next-Intl, Clerk, ImageKit, Socket.IO, OneSignal

- Developed a full-stack agricultural waste management platform enabling farmers to discover waste management solutions, list categorized farm waste, and connect with buyers for browsing, negotiation, and direct purchasing.
- Built Progressive Web App (PWA) support enabling installable mobile experience and offline functionality for low-connectivity regions.
- Implemented voice-enabled accessibility including read-aloud and microphone-based voice input to improve usability for farmers.
- Implemented secure authentication (Clerk), image storage (ImageKit), and real-time communication using Socket.IO.
- Integrated push notifications using OneSignal and added multilingual support (English, Hindi, Marathi) using next-intl.

EDUCATION

Sipna College of Engineering and Technology

2023 – 2026

B.E. in Computer Science and Engineering

Government Polytechnic Arvi

2020 – 2023

Diploma in Computer Science and Engineering
